Re: Zoning Change Review – RDOE McKinney
CECI Project No. 12122

Dear Michael:

Attached please find the Zoning Change Submittal for the RDO Equipment Development. The property is located at the southeast corner of U.S. Hwy 75 and Wilmeth Road. The intent of the Owner is to Revise the Zoning to make slight modifications to the approved Site Plan, for the RDO Equipment Project that is currently under construction. Project details are summarized as follows:

- Subject property is 10.79 acres
- The subject tract is currently PD with base of C and is located within the CC Overlay District
- The property is being rezoned to PD with base of C
- Owner is seeking to rezone the subject property in order to replace the zoning exhibit which is tied to the existing PD with a new zoning exhibit which is more reflective of the anticipated business needs
- Target Planning & Zoning Commission date is February 25, 2014
- Target City Council date is March 18, 2014

Provisions from the original request that were approved and are still applicable are as follows:

- Owner is seeking a variance to allow heavy equipment sales and service to be located in the PD.
- Owner is seeking a base zoning of C, with a variance to allow for building materials other than 100% brick or stone, of which at least 50% will be masonry materials.
- Owner is seeking a variance to allow gravel surfaces for maneuvering and overnight storage areas due to a majority percentage of the equipment being track vehicles.
- Owner requests that the property be allowed to develop with bay doors facing Wilmeth Road. Bay doors will be screened with a living screen and wrought iron fence.

There is an automobile dealership with sales and service to the south, a Blockbuster Distribution warehouse to the northeast, and a QuikTrip fuel center catering to both automobile and trucks to the north. We understand there will also be a Kubota tractor dealership developed at the northwest corner of Redbud Boulevard and Wilmeth Road. Recent Business research has indicated that this Dealership will likely be undersized for the anticipated business demand. We would like to have the flexibility of increasing our equipment storage yard now, and possible increase our building size and display area in the future, as shown on the attached Zoning Exhibit.

Per the owner: RDO Equipment Company will be designing our new RDO – McKinney store to meet the LEED certification design standards, as set forth by the United State Green Building Council (USGBC). Our goal is to

meet and/or exceed the current energy code requirements along the way, setting a benchmark for future area developments. We also plan to incorporate a Wash Bay facility that reclaims 100% of the wash water for future reuse, as we have done at our other store locations. We will be mindful of the environment through our material selection process, to include our site landscaping plan. We plan to use as many local and regional building materials as possible. In our effort to achieve a sustainable, energy efficient structure we will continue to uphold the highest aesthetic standards.

Thank you in advance for your consideration with this matter. Please contact me if you have any questions or concerns.

Sincerely,

CROSS ENGINEERING CONSULTANTS, INC.
