*Knowledge/Experience:*

I believe that my degree in landscape architecture and my age will bring a unique perspective to any of the boards, but particularly the Main Street, Parks, and Historic Preservation boards. I learned basic planning principles as well as multi-use urban design. I live in a historic house and understand the desire to preserve history while weighing the benefits of starting over. I understand how landscapes are created, the steps involved and would be able to show that prospective to the Parks board. I think that my degree in fine art, my art background, the courses that I took related to public art while pursuing my masters in landscape architecture, and my involvement in some of the local art shows and events will be helpful on the Art Commission board. I am an enthusiastic supporter of the green movement and I think that finding the balance between environmentally friendly, aesthetically pleasing, functionality, and cost effective is something that all of these boards need to be concerned with. I think that I can help with that
