

# Downtown Lighting

November 5, 2019

## Downtown Lighting Improvements

- Over the past several years, improvements to lighting in downtown have been made in conjunction with street improvements, parking lot construction and private development.
- City staff from the Engineering and Public Works departments have identified each light fixture in downtown and have worked to make sure they are all operating properly.
- Main Street worked with the downtown merchants and property owners to identify areas in need of additional lighting.

## Downtown Lighting Improvements

- Public Works solicited quotes on the selected lighting improvements.
- The requested \$200,000 will cover the cost to purchase and install the proposed lighting, including running electricity, constructing pole base piers and setting the light poles.
