EXHIBIT C

General Planned Development Standards for Approximately 5.333 Acres

I. Purpose and Intent:

The purpose of this planned development is to provide a framework for high quality, mixed-use development, providing for a mix of retail, office, restaurant, and residential uses. These standards are intended to govern proper mixed-use design.

II. Development Standards

The subject property shall develop in accordance with the Zoning Ordinance, and as amended, except as follows:

- A. The subject property shall be developed according to the "C1"- Neighborhood Commercial District of the City of McKinney Zoning Ordinance, and as amended, except as follows:
 1. Multi-family residential uses shall be permitted in the "C1"- Neighborhood Commercial District, so long as:
 - a. Multi-family residential uses shall not be permitted on the first floor, with the exception of a leasing office and / or amenities for the multi-family residential uses.
 - b. Maximum residential density shall be fifteen (15) dwelling units per acre.
 2. All development shall have a maximum height of three (3) stories, not to exceed 35 feet.
 3. Individual, non-residential uses shall be no greater than 5,000 square feet in floor area.
 4. Minimum rear setback for mixed-use buildings shall be 80'. Minimum rear setback for C1 uses, other than mixed-use, shall be 65'.

IV. Site/Building Design:

- A. A minimum of 50% of the first floor facade area of all buildings shall be dedicated to windows and doors; blank facades shall not exceed 25 feet in length.
- B. Buildings shall be designed to have a prominent entryway, defined by building articulation and / or canopies, that front onto right-of-way or public streets.
 1. Additional requirements:
 - a. All buildings shall be designed with a strong base, distinctive middle and well-defined cornice treatment (tripartite design).
 - b. Loading shall not be located in front of any building and shall be enclosed

within the building. Loading / unloading areas shall be enclosed by overhead doors which, when closed, will completely enclose the loading area.

- C. Multi-family residential structures located within 100 feet of any adjacent single family residential use or zone shall be designed and constructed so that no exterior facing window, oriented toward said adjacent single family residential use or zone, is located within 100' of said residential use or zone.

V. Open Space

- A. Common, useable open space shall be associated with every building so that:
 - 1. For 0-20,000 square feet of floor area, at least 1 square foot of open space is required for each 100 square feet of floor area;
 - 2. For 20,001-40,000 square feet of floor area, at least one square foot of open space is required for each 75 square feet of floor area; and
 - 3. For above 40,000 square feet of floor area, 1 square foot of open space is required for each 50 square feet of floor area:
- B. All outdoor public spaces described above shall provide:
 - 1. At least 1 tree or planter for each 75 square feet of open space; and
 - 2. At least 1 linear foot of seating for each 75 square feet of open space.
- C. An open space exhibit plan, detailing the above, shall be submitted along with the required site plan.

VI. Exceptional Quality

- A. The exterior of all elevations on each building shall feature a minimum of 85% brick, stone, synthetic stone, or any combination thereof. The balance of the exterior finishing materials may include EIFS, architectural concrete masonry units (CMU), metal, treated wood and/or glass curtain wall systems. The wood component shall not exceed 10% of the façade elevation.
- B. Any development containing multi-family residential uses shall include a minimum of two (2) major architectural / site enhancements, a minimum of six (6) minor architectural / site enhancements, and minimum of four (4) amenities, as described in Section 146-139 of the Zoning Ordinance.
- C. All required trees shall be spaced at 20' on centers within the landscape buffer surrounding the site. Trees along the street frontage may be grouped or clustered to facilitate site design.
