

MILL DISTRICT

Intent - The vision for a transit village and urbanized State Highway 5 corridor is anchored by the respected heritage and vitality of the surrounding neighborhoods.

DESCRIPTION

Most of this District is already developed; its existing neighborhoods are vital to the District's thriving future. Public infrastructure in these neighborhoods, among the oldest in McKinney, may need repair or rehabilitation so it can continue to support the neighborhood's residents and businesses. Old Settlers Park is a valuable amenity for this District and provides an excellent opportunity for loft living, townhomes and live/work uses that provide density in an urbane and comfortable way. The District's existing neighborhoods are complemented and strengthened by Transit Ready Development (TRD) around the future transit stop between Virginia and Louisiana streets. Along with other priorities stated in the Town Center Study Phase I Report, new construction and redevelopment in the Mill District should be balanced with preservation of existing neighborhoods in the area, both in terms of uses and scale.

The City's Town Center Study Phase I Report and associated Illustrative Vision (collectively known as the Town Center Master Plan) largely establishes the design criteria, development approach and implementation program for this area. The character-defining placetypes

for the Mill District's new development are Transit Ready Development and Urban Living. The historic Flour Mill site provides a distinctive anchor for a potential transit village, and the immediate surrounding area is ideally situated for Transit Ready Development that will create new and distinctive choices within the District. This area around the potential transit stop provides an expanded "downtown development pattern" east of Highway 5. The other potential transit stop sits on the border of the neighboring Business & Aviation District. This stop is better suited for a park-and-ride facility due to its close proximity to the TRD area to the north. As such, development near this transit stop should cater to commuters and others utilizing the transit.

Adaptive reuse of historic buildings should be encouraged in the Mill District and several structures have been noted as having potential for reuse. Revitalization must be done in a way that is compatible with the existing neighborhoods and that makes them even better places to live. Densities of redevelopment should be reduced from west to east to ensure compatibility with existing neighborhoods.

“Transit Ready Development that will create new and distinctive choices within the District”

With anchors such as Old Settlers Park, the historic Flour Mill, the historic Cotton Mill, and the future potential rail stop - the Mill District is a prime target for redevelopment initiatives that both densify existing neighborhoods and introduce new housing product types. The walkable street pattern that runs through the Historic Town Center District is replicated here, and public transit services should be available throughout the District. The Mill District is often described as the most distinctive and representative of what makes McKinney unique in the region. Among the 17 Districts that comprise the larger planning area, it is the only one slated for any significant level of redevelopment.

Given the limited number of opportunities for any sizable new development, residential and non-residential future investment and reinvestment activity will likely replicate what is already in place - perhaps with greater intensity in the vicinity of public transportation or transit improvements. Whereas a community's urban core is frequently the ideal

setting within which to introduce otherwise untested residential product types, the mix of formats envisioned here include row houses, townhomes, stacked flats, zero lot line and potentially transitional housing for seniors.

Households in this District are a healthy mix of young and old, single and married individuals, with and without children, from various ethnic groups, that find diversity an essential neighborhood quality. Household incomes are comparatively modest, as are home prices. However, what housing products may lack in profile and value, is made up for in public amenities. As a District largely comprised of established neighborhoods, schools, churches, shopping opportunities and service providers are largely accessible via non-vehicular mobility options. The households that have children tend to be family-centric. Households with individuals that are either empty nesters or retirees prefer to spend their time on leisure activities including golf and dining out, rather than home maintenance.

STRATEGIC DIRECTION

DEVELOPMENT PATTERN

1. **Transit Ready Development** is the first of two character-defining placetypes and is located east of SH 5 between Virginia and Louisiana Streets along the rail corridor and a potential future transit station. This TRD designation is as envisioned by the Town Center Master Plan. The area developed with this placetype would occur through redevelopment and adaptive reuse of existing buildings in the area and new construction. The limits of this placetype should mirror that of the Transit Village Core Character District of the McKinney Town Center Zoning District and should create a strong connection to Old Settlers Park.

2. A second location for **Transit Ready Development** placetype is along the rail corridor just north of the future potential transit station located between Wilson Creek Parkway and Industrial Boulevard. While this station is currently envisioned to be a park-and-ride facility, opportunities for a higher intensity of Transit Ready Development in this area should be maximized in accordance with the Cotton Mill Core Character District of the McKinney Town Center Zoning District.

3. **Urban Living** is the second character-defining placetype in this District and is located immediately north of the Transit Ready Development and Old Settlers Park. This placetype is intended to provide a transition in intensity between the Transit Ready Development (which includes retail and office uses in a mixed-use environment) and the existing residential uses in the District. The design and density of Urban Living development should create a walkable, pedestrian-friendly environment in the public and private spaces between the residential structures.

4. **Neighborhood Commercial** should be located at the intersection of US 380 and Throckmorton, and at Greenville Street and Airport Boulevard. These sites are intended to provide supporting retail services and restaurants for the significant employment base that will develop in this District, as well as the current and future residents.

5. Any infill development or adaptive reuse that occurs within these areas should be consistent and/or compatible with the existing built conditions and/or should demonstrate compatibility with the placetypes and priorities shown in the Land Use Diagram.

IDENTITY, AMENITIES, & INFRASTRUCTURE

Key identity and amenity features such as gateways, trails and parks are described in detail in the City of McKinney Parks and Recreation Master Plan. Additionally, the following considerations are key to reinforcing the vision for and intent of this District.

1. Key Amenity Features in this District include two potential transit stations and two historic cemeteries. Future development in the District should take full advantage of the unique opportunities created by these amenities. The cemeteries should be properly protected from nearby development.
2. As transportation, water, wastewater and stormwater infrastructure in this District is upgraded to support the existing neighborhoods and future development envisioned in the area, a focus should be placed on the appearance of these improvements in order to create a high-quality public realm in the area that is attractive to new investment.
3. Multi-purpose trails and enhanced pedestrian amenities should be among the priorities in this areas in order to encourage and promote an active, truly urbane environment at and around the Transit Ready Development.

The graphic that follows provides a profile of the Collin McKinney Commercial District if the District develops as outlined above. These graphics relate to new development only.

ANTICIPATED PUBLIC INVESTMENTS & INITIATIVES

The City of McKinney intends to consider the following major public investments to support the success of the Business & Aviation District.

1. Investment in needed repair and rehabilitation of infrastructure in the Mill District's existing neighborhoods.
2. Initiatives to record and celebrate the history of the neighborhoods and buildings in the Mill District.
3. Active participation in regional dialogue about funding and location of transit service in Collin County.
4. Focused planning, design and economic development incentives for Transit Ready Development in the area surrounding the future transit station.
5. Continued refinement of the TIRZ program to encourage rehabilitation of aging structures, adaptive reuse, and other private improvements.
6. Consider the creation of a specific development code or other mechanism to ensure that the desired development patterns along the State Highway 5 Corridor are achieved throughout this District.
7. Redesign State Highway 5 through the Mill District as consistent with the State Highway 5 Corridor Master Plan and Town Center Master Plan in order to improve connectivity to the Town Center District, as well as safety for all users of the roadway.
