

AGENDA ITEM

TO: Planning and Zoning Commission

THROUGH: Brandon Opiela, Planning Manager

FROM: Samantha Pickett, Planner II

SUBJECT: Conduct a Public Hearing to Consider/Discuss/Act on a Rezone Fewer than 13 Acres from “PD” – Planned Development District to “PD” – Planned Development District, to Allow for Townhome Uses and to Modify the Development Standards, Located Approximately 600 Feet South of Virginia Parkway and on the East Side of Hardin Boulevard

APPROVAL PROCESS: The recommendation of the Planning and Zoning Commission will be forwarded to the City Council for final action at the November 4, 2014 meeting.

STAFF RECOMMENDATION: Staff recommends denial of the proposed rezoning request due to lack of conformance with the City Council’s goal of preserving and developing the non-residential tax base.

However, should the rezoning request be approved, the applicant is requesting approval of the following special ordinance provisions:

1. The use and development of the subject property shall develop in accordance with the attached development regulations.
2. The development of the subject property shall generally conform to the attached concept plan exhibit.
3. The attached site layout may not be constructed until all Engineering regulations have been satisfied, subject to review and approval by Director of Engineering.

Staff’s professional opinion is that the subject property’s location and topography are fairly conducive for residential uses and the proposed townhome use can serve as an appropriate transition between the future commercial to the north and the single family residential subdivision to the south.

September 26, 2014 (Revised Submittal)
October 2, 2014 (Revised Submittal)

ITEM SUMMARY: The applicant is requesting to rezone approximately 12.72 acres of land for 40 townhomes, located approximately 600 feet south of Virginia Parkway and on the east side of Hardin Boulevard, from “PD” – Planned Development District, generally for office uses, to “PD” – Planned Development District, generally for single family attached residential (townhome) uses. Additionally, the applicant has provided a concept plan exhibit that will govern the development of the subject property.

At the March 25, 2014 Planning and Zoning Commission meeting, the Commission voted 7-0-0 to table the rezoning request to the next meeting in order to give the applicant time to address some of the surrounding neighbors’ concerns. At that time, the applicant’s request consisted of rezoning the property to allow for single family detached residential uses, generally on 40-foot wide lots with front-entry garages.

At the April 8, 2014 Planning and Zoning Commission meeting, the Commission voted 6-0-0 to table the rezoning request indefinitely per the applicant’s request.

Prior to the July 22, 2014 Planning and Zoning Commission meeting, the applicant revised the rezoning request from a 40-foot wide, single family detached residential product to a 25-foot wide, single family attached residential (townhome) product, both with front-entry garages. At the meeting, the Commission voted 6-0-0 to table the rezoning request indefinitely per the applicant’s request.

At the August 26, 2014 Planning and Zoning Commission meeting, the Commission voted 3-2-0 to recommend denial of the proposed rezoning request.

At the September 16, 2014 City Council meeting, the Council tabled the item indefinitely in order for the applicant to address Council’s concerns regarding an alley-served townhome product and associated architectural standards. Due to the extent of the changes made to the concept layout to accommodate alleys, this request is being heard again by the Planning and Zoning Commission and the recommendation of the

Commission will be forwarded to the City Council for final consideration at the November 4, 2014 City Council meeting.

Prior to the October 14, 2014 Planning and Zoning Commission meeting, the applicant revised the rezoning request from a front-entry townhome product to an alley-served, rear entry townhome product, with additional provisions regarding architectural elevations, landscaping, entry design, and open space requirements.

ZONING NOTIFICATION SIGNS: The applicant has posted zoning notification signs on the subject property, as specified within Section 146-164 (Changes and Amendments) of the City of McKinney Zoning Ordinance.

SURROUNDING ZONING AND LAND USES:

Subject Property: "PD" – Planned Development District Ordinance No. 2007-03-021 (Office Uses)

North	"AG" – Agricultural District (Agricultural Uses)	Undeveloped Land
South	"PD" – Planned Development District Ordinance No. 2007-12-118 and "PD" – Planned Development District Ordinance No. 2005-05-049 (Single Family Residential Uses)	Sorrellwood Park
East	"PD" – Planned Development District Ordinance No. 2005-05-049 (Single Family Residential Uses)	Sorrellwood Park and Undeveloped Land
West	"PD" – Planned Development District Ordinance No. 2008-05-045 (Commercial Uses) and "AG" – Agricultural District (Agricultural Uses)	Undeveloped Land

PROPOSED ZONING: The applicant has indicated that the subject property will develop in accordance with the "TH" – Townhome Residential District's regulations as found in the Zoning Ordinance, with additional provisions regarding architectural elevations, landscaping, entry design, and open space requirements, detailed below.

Additionally, the applicant has proposed that all townhomes on the subject property shall develop in accordance with the character of the attached building elevations, specifically utilizing façade offsets, projections, dormers and other architectural features to break up long, flat wall planes, highlighting doors and windows with patterned brickwork, awnings, keystones and other elements, and requiring that each home be finished with a minimum of 90% percent masonry materials (exceeding the Zoning

Ordinance requirement of 85%). Additionally, to further screen the alley and rear of the townhomes from the adjacent neighborhood to the southeast, six (6) foot tall evergreen shrubs (planted every six feet on center) or a six (6) foot tall board-on-board fence shall be placed along the east side of the alley between the proposed townhomes and existing single family subdivision to the south.

Section 146-94 ("PD" – Planned Development District) of the Zoning Ordinance states that a PD Ordinance may not be approved without ensuring a level of exceptional quality or innovation for the design or development. To satisfy this requirement, and in addition to the proposed architectural standards, the applicant has proposed the following:

- a. The main entrance into the community shall feature a divided entrance containing a landscaped median separating the traffic entering the neighborhood from the traffic exiting the neighborhood with a landscaped divided open space median that meets all requirements of Section 146-108 (c)(1)(e) items #1-4; and
- b. A stone monument sign shall be constructed within the landscaped median at the entrance to the subdivision and will also include manicured plant and ground cover vegetation; and
- c. An unmanned gate house shall be constructed within the landscaped median at the main entrance into the subdivision; and
- d. At least 100,000 square feet (2.40 acres) of open space outside of the 100 year fully developed floodplain shall be dedicated to and maintained by the HOA, and shall not be counted towards any applicable park land dedication requirements as mandated by the City's subdivision regulations. These areas are identified as Common Areas #1, 2, and 3 on the attached concept plan dated July 28, 2014 (less the 4.029 acres of fully developed 100-year floodplain within Common Area #3).
 - o It should be noted that Staff is currently unable to verify, without additional engineering information, that approximately 2.40 acres of open space can be achieved outside of the 100-year fully floodplain.

Lastly, the Director of Engineering has concerns regarding the rezoning request, as the construction of the attached site layout does not meet Engineering regulations, due to the fact that currently the site layout:

- Shows lots within the dam breach area;
- Shows lots within the 100-year fully developed floodplain; and
- Does not indicate the location of the possible detention area;

Upon completion of the necessary engineering, the development may have critical elements which would require significant design changes and may make some of the portions of the property unusable and potentially cause a reduction to the number of lots. Currently, 24 of the 40 proposed lots, or approximately 60% of the development, would not be buildable due to their location within the floodplain. The applicant has not yet provided information validating the usability of the subject property as shown on the attached concept plan exhibit.

CONFORMANCE TO THE COMPREHENSIVE PLAN: The Future Land Use Plan (FLUP) designates the subject property for high density residential and floodplain uses however it is currently zoned for neighborhood office uses. The FLUP modules diagram designates the subject property as Suburban Mix within a significantly developed area. The Comprehensive Plan lists factors to be considered when a rezoning request is being considered within a significantly developed area:

- **Comprehensive Plan Goals and Objectives:** The proposed rezoning request is generally not in conformance with the goals and objectives of the Comprehensive Plan, particularly the goal of “Land Use Compatibility and Mix”, specifically through the objective of “land uses patterns that optimize and balance the tax base of the City”.

Additionally, the proposed rezoning request does not help to further a strong, balanced economy, which is a stated strategic goal of the City Council. Approximately three quarters of the City’s tax base comes from its residential housing stock. In order to balance this tax base, more non-residential uses are needed. Rezoning approximately 13 acres currently designated for office uses to residential uses will not help to balance the ad valorem tax base.

With that said, the Future Land Use Plan anticipated high density residential uses on the property which Staff feels is fairly conducive to residential uses due to significant grade changes across the property as well as the property being more of a “mid-block” tract with a distance of approximately 500 feet from the intersection of Hardin Boulevard and Virginia Parkway. Staff is also of the opinion that the proposed townhome uses could complement future commercial opportunities to the north and act as a natural transition between future commercial and existing single family detached residential to the south (Sorrellwood Park).

- **Impact on Infrastructure:** The proposed rezoning request should have a minimal impact on the existing and planned water, sewer and thoroughfare plans in the area, as the subject property was planned for high density residential uses and single family attached residential uses typically have a lower demand on infrastructure.
- **Impact on Public Facilities/Services:** The proposed rezoning request should have a minimal impact on public services, such as schools, fire and police,

libraries, parks and sanitation services, as the subject property was planned for high density residential uses.

- Compatibility with Existing and Potential Adjacent Land Uses: The properties located adjacent to the east and south of the subject property are zoned for single family detached residential uses and would be compatible.
- Fiscal Analysis: The attached fiscal analysis shows a negative cost benefit of \$144,442 using the full cost method.
- Concentration of a Use: The proposed rezoning request should not result in an over concentration of single family residential land uses in the area.

CONFORMANCE TO THE MASTER PARK PLAN (MPP): The proposed rezoning request does not conflict with the Master Park Plan.

CONFORMANCE TO THE MASTER THOROUGHFARE PLAN (MTP): The proposed rezoning request does not conflict with the Master Thoroughfare Plan.

OPPOSITION TO OR SUPPORT OF REQUEST: Staff has received two letters in opposition to the rezoning request, one letter in support and one petition in support of the rezoning request. Additionally, at the March 25, 2014 Planning and Zoning Commission meeting, four residents expressed concerns regarding the proposed lot size, the proposed common area to the south of the development, and decreasing home values (see PZ Minutes – 03.25.14). At the July 22, 2014 Planning and Zoning Commission meeting, one resident spoke in favor of the proposed request (see PZ Minutes – 07.22.14).
