**ITEM SUMMARY:** The applicant is proposing to subdivide approximately 10.00 acres of land, located approximately 1,350 feet east of FM 2933 and on the north side of County Road 341 within the City of McKinney's Extraterritorial Jurisdiction (ETJ). Since the subject property located within the City's ETJ, the regulations of the Zoning Ordinance do not apply to the subject property; however, regulations of the Subdivision Ordinance do apply.

Under State Law, before a property can be subdivided in the City of McKinney ETJ, it must be platted and filed for record with the Collin County Clerk, in accordance with the City of McKinney's subdivision regulations. Typically, preliminary-final plats are considered by the Planning and Zoning Commission. This preliminary-final plat has bypassed the Planning and Zoning Commission and is being considered by the City Council because the applicant has requested several variances to the requirements of the Subdivision Ordinance. Per the Subdivision Ordinance, only the City Council can grant a variance.

The applicant is requesting to subdivide the property into one lot to construct a single family residence and an accessory building. A house and accessory building are currently existing on the property and it is the applicant's intention to demolish the existing buildings to construct a new single family home. The applicant has indicated to Staff the desire to not construct or escrow for the typical required improvements, such as water, sanitary sewer, and roads; however, the applicant has agreed to provide the easements for said infrastructure, and to enter into a facilities agreement with the City of McKinney.

**PLATTING STATUS:** The subject property is currently unplatted. Subsequent to the approval of the preliminary-final plat with the associated variance requests and conditions, a record plat, subject to review and approval by the Director of Planning, must be filed for recordation with the Collin County Clerk, prior to issuance of a building permit.

Discussion: Under the requirements of the Subdivision Ordinance, the applicant will be required to construct all necessary public improvements prior to filing the associated plat, unless otherwise specified in an approved facilities agreement. Required public improvements include the following:

Road Improvements: The site is currently served by CR 341 which is a 20-foot wide asphalt roadway with roadside ditches. The applicant would be required to reconstruct CR 341 adjacent to the site with minimum 24-foot wide concrete curb and gutter pavement, 4-foot sidewalk, and an underground drainage system. The applicant has proposed to only dedicate right-of-way for CR 341.

Water Improvements: The site is currently served by a 3-inch water line owned by North Collin Water Supply Corporation. The applicant would be required to construct City of McKinney water lines including an 8-inch water line along CR 341 and offsite water lines capable of supplying adequate fire flow to the site. The site is located approximately 4 miles from the nearest City of McKinney water line. Since an 8-inch water line can be located within the right-of-way for CR 341, the applicant has proposed to take no action on the water improvements.

Sewer Improvements: The site is adequately sized to be served by a septic system. The applicant would be required to construct City of McKinney sewer lines including a master planned 12-inch sewer line along the north boundary of the site and offsite sewer lines capable of serving the site. The site is located approximately 1 miles from the nearest City of McKinney sewer line. The applicant has proposed to only dedicate an onsite easement for the sewer improvements.

Drainage improvements: The site includes a creek which drains agricultural and estate residential land upstream from the site. The applicant would be required to study the creek and provide adequate capacity for fully-developed flow in the creek along the north boundary of the site. The applicant has proposed to only dedicate an onsite easement for the drainage improvements.

**DRAINAGE:** The applicant will be responsible for all drainage associated with the subject property, and for compliance with the Storm Water Ordinance, which may require on-site detention, unless the requested variances are approved.
