

Director's Report

February 2022

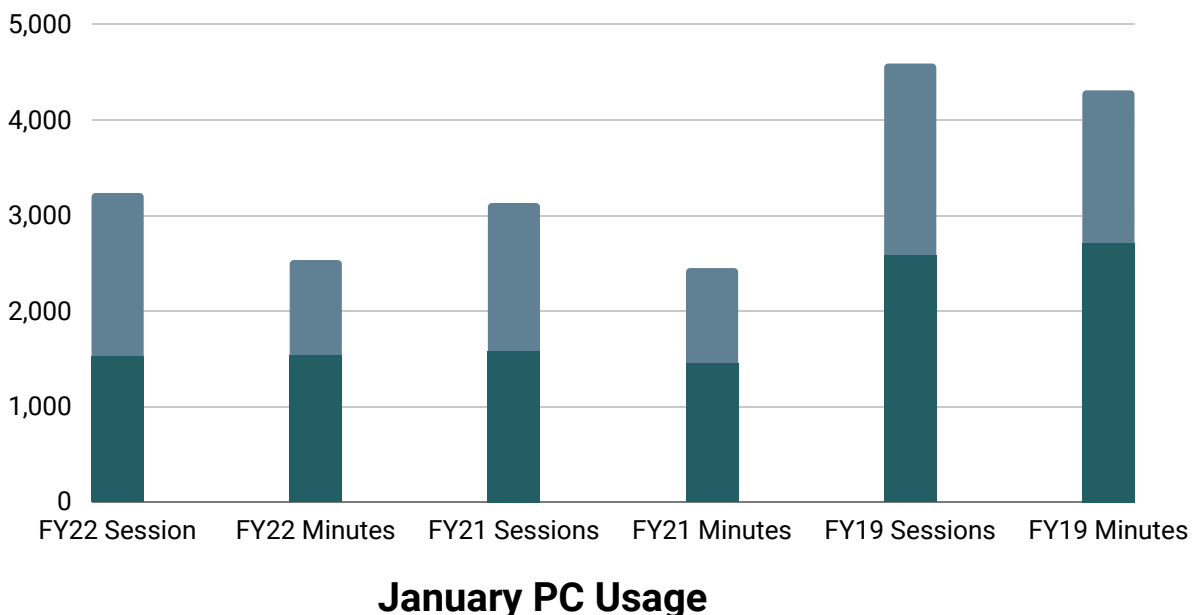

By the Numbers

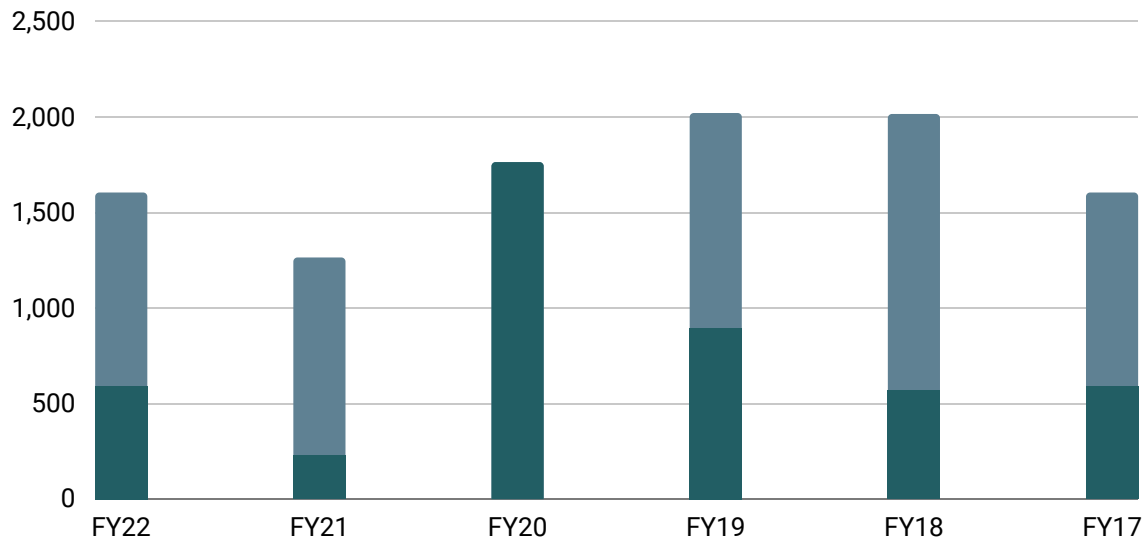

Overall circulation, including digital items, was higher in January, 2022 than January of 2021 or 2020, but only at 88% of January 2019's totals. However, digital checkouts continue to hold strong above 20,000 in the month.

PC Usage increased at both library locations in January, compared to January of 2022, but is not quite back to pre pandemic usage.

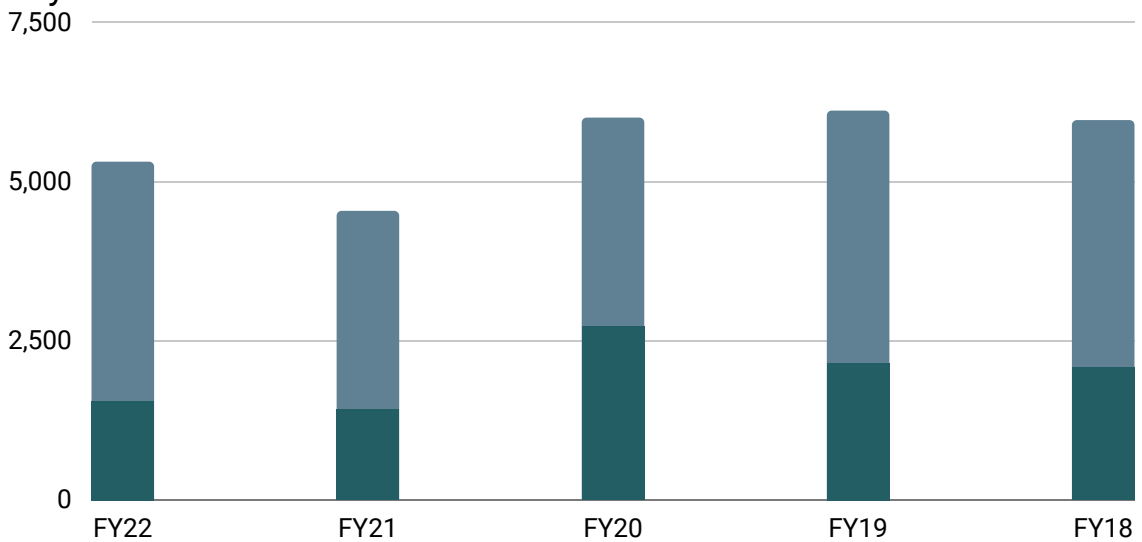

More people attended programs at both library locations in January of 2022 than in January of 21, but fewer than our pre-pandemic attendance. Interestingly, program attendance was exactly the same as January of 2017.

January Program Attendees

The number of unique cardholders who checked out at least 1 item in January increased over January, 2021, at both locations, and increased over January 2020 at JJGL.
