Subject: Removal of Brick Requirement 9409 LearJet LN

We are respectful requesting the removal of the brick requirement for the address listed. This address will be shielded from the homes to the east when construction begins on the lots 34 & 35. Mr. O'Rielly feels put upon with this requirement as the other owners of the 5 hangars adjacent to the runway in the same position on the field have not put brick on their buildings. Note that all of the S-2 Storage facilities along Thompson taxiway are bricked and it's just a matter of time before a hangar goes up on lot 35 to shield Mr. O'Rielly from the homes to the east. This request is not new. The hangar at 9409 Piper Cub was released from this requirement prior to hangars shielding him. As the Builder and Owner of lot 35 which by the way is one of three currently for sale and given the demand I believe the shielding of Mr. O'Rielly will occur very shortly.

Regards
