See attached pics that I took at MCA in the afternoon. The Elementary pictures were taken at 3:10apm when they release the elementary school (lower school as MCA labels it). The High School or Upper school pictures were taken at 3:25pm when the middle and high school kids are dismissed. After speaking to James Casey who is the facilities mgr. if a parent has multiple students at different grade levels there are to pick the kids up at the elementary school

Samantha talked to Bob Lovelady, Head of MCA, that said they had 2 major events that could result in parking on the street. It was not a daily basis. That is extremely common at any school, if they have parent-teacher conferences or a school party the resulting issues is not enough parking on site for that event. Last year all the students started and were dismissed at the same time. Starting this past fall, it was changed to staggered arrival and dismissal times.

I received confirmation from James Casey, MCA Facilities Mgr., and Samantha from Bob Lovelady that MCA would support No Parking. I would not recommend the installation. After what Samantha and I witnessed for a couple days last week that traffic is not an issue related to the school and any no parking zone will have a negative impact on the residents that live there.

I believe Mr. La Plante;'s pictures were either taken during the large school event or a previous school year.
