The Planning and Zoning Commission is required, per the governing planned development district, to review the proposed elevations and pictures of the surrounding buildings for conformance with the aforementioned requirements. Staff feels that the proposed elevations meet the intent of the aforementioned PD standards due to the use of brick and stone in a consistent manner on all four sides of the building and by providing architectural continuity among the other buildings nearby.

Even though the applicant submitted proposed elevation drawings so that Staff could review these standards, the applicant is still responsible for submitting a full elevations package to the Building Inspections Department. At that time, the elevations must meet the requirements of Section 146-139 (Architectural and Site Standards) of the City of McKinney Zoning Ordinance and the governing planned development district as well as meeting the minimum point score for non-residential/non-industrial projects, subject to the review and approval by the Chief Building Official.
