Consider/Discuss/Act on Adopting a Liquid Waste Ordinance and Amending Appendix A Schedule of Fees

COUNCIL GOAL: Operational Excellence
 2E: Continuously provide a high level of customer service to our citizens
 Enhance the Quality of Life in McKinney
 5E: Develop sustainable quality of life improvements within the City of McKinney

MEETING DATE: November 3, 2020

DEPARTMENT: Public Works Department

CONTACT: Julia J. Hunt, P.E., Interim Director of Public Works

RECOMMENDED CITY COUNCIL ACTION:

- Approve the Liquid Waste Ordinance.

ITEM SUMMARY:

- The City of McKinney operates and maintains a wastewater collection system. As part of the operation and maintenance, the Public Works Department entered into a Sanitary Sewer Overflow Initiative (SSOI) with the Texas Commission on Environmental Quality (TCEQ) which was formalized as Enforcement Case No. 54304. The SSOI defines actions that the city agreed to take in order to reduce sanitary sewer overflows.

BACKGROUND INFORMATION:

- The Public Works Department operates and maintains 728 miles of sanitary sewer pipeline ranging in diameter from 4” to 48.”
- There are over 600 grease traps/interceptors at food service establishments in the City.

- The City of McKinney entered into a SSOI agreement with the TCEQ on February 23, 2018.
- In the SSOI, the City of McKinney agreed to review existing ordinances and propose modifications regarding the frequency of businesses cleaning grease traps and submit these modifications to the City Council of McKinney for consideration and approval.
- The City of McKinney entered into an agreement with North Texas Municipal Water District (NTMWD) to work together in good faith to establish a model written Regional Capacity, Management, Operations, and Maintenance (CMOM) program related to aspects of NTMWD's and Communities' practices, assets, and programs including a comprehensive Fats, Roots, Oil, and Grease (FROG) program.
- Part of a FROG program includes adopting an ordinance addressing liquid wastes generated by food service establishments.
- The Liquid Waste ordinance will allow staff to enforce grease trap cleaning and monitor the life cycle and proper disposal of liquid wastes generated by food service establishments.

FINANCIAL SUMMARY:

- There is a minimal impact on the budget. It is anticipated that the liquid waste hauler inspections and permitting will be conducted by existing personnel. There will be revenue from the permitting of grease hauler vehicles estimated in the range of \$3,000-\$4,000 total. This revenue will be used to offset the cost of the inspection program.
