As such, Staff recommends approval of the proposed rezoning request.

**CONFORMANCE TO ONE MCKINNEY 2040:** A key aspect of the ONE McKinney 2040 Comprehensive Plan is to provide direction related to the desired development patterns and to inform decisions related to the timing and phasing for future infrastructure investments in the City. To assist in guiding these decisions, the Preferred Scenario and Land Use Diagram establishes distinctive districts, each with a clear intent and market focus that are reinforced through character-defining placetypes. In conjunction with the Preferred Scenario, there will be a series of district diagrams which outline the desired development patterns for each unique area of McKinney. Per the Preferred Scenario, the subject property is located in the Established Community District. General placetypes included in this district are Suburban Living, Employment Mix, and Neighborhood Commercial.

- Guiding Principles: The proposed rezoning request is generally in conformance with Guiding Principle of "Places (To Live, Work, Play, and Visit) established by the Comprehensive Plan. In particular, the proposed request has the potential to provide "enhance the distinctive character of individual neighborhoods while

strengthening the connections throughout the city in order to unity the entire McKinney community”.

- Land Use Diagram Compatibility: In evaluating development requests, the City should determine that a project meets the majority of the established criteria to be considered compatible with the Land Use Diagram. The proposed rezoning request aligns with the Suburban Living placetype of the Established Community District. Furthermore, the proposed request of “SF7.2” - Single Family Residential District should be compatible with the surrounding properties and placetypes, including Suburban Living, Employment Mix, and Neighborhood Commercial placetypes.
- Land Use and Tax Base Summary: Module 53 is currently comprised of approximately 88.3% residential uses, 11.6% non-residential uses (including institutional and agricultural uses). The proposed rezoning request will have no impact on the anticipated land uses in this module. Estimated tax revenues in Module 53 are comprised of approximately 80% from residential uses and 20% from non-residential uses (including agricultural uses). Estimated tax revenues by type in Module 10 are comprised of approximately 84.8% ad valorem taxes and 15.2% sales and use taxes.
