DESIGN EXCEPTION: A Design Exception is a requested deviation from any Building Form and Site Development Standards, Building Design Standards, or Open Space Standards, beyond minor deviations specified in the Minor Modifications section of the

“MTC” - McKinney Town Center Zoning District. All requests for a Design Exception are forwarded to the Planning and Zoning Commission for discretionary approval.

In reviewing any site plan applications or Design Exception requests, the Planning and Zoning Commission shall use the following criteria:

- 1) The goals, intent, and vision of the adopted McKinney Town Center Master Plan;
- 2) The extent to which the proposal fits the adjoining design context by providing appropriate building scale and use transitions;
- 3) The extent to which the proposal provides public benefits such as usable civic and open spaces, livable streets, structured and/or shared parking, and linkages to transit;
- 4) The extent to which the proposal hinders future opportunities for higher intensity Town Center development; and
- 5) Considerations of health and welfare of the general public.

Within the Downtown Edge Character District of the MTC, commercial and mixed-use buildings shall have flat or low pitched roofs with parapets. Typically, this requirement is achievable and seen on buildings with multiple stories. With this proposed development only being one story, it is difficult to achieve the intent of this requirement. Additionally, the character of this building design compliments the surrounding residential buildings. From Staff's perspective, the use of this roof type transitions the look of the buildings from the multi-family residential development located to the north to the single family homes to the east, south, and west. As such, Staff is in support of the requested design exception.

OPPOSITION TO OR SUPPORT OF REQUEST: Staff has received no comments in support of or in opposition to this request.
