ITEM SUMMARY: The applicant is proposing to subdivide approximately 9.92 acres of land, located approximately 960 feet south of the intersection of U.S. Highway 380 and Private Road 5312 within the City of McKinney's Extraterritorial Jurisdiction (ETJ). Since the subject property is located within the City's ETJ, the regulations of the Zoning Ordinance do not apply to the subject property; however, regulations of the Subdivision Ordinance do apply.

Under State Law, before a property can be subdivided in the City of McKinney ETJ, it must be platted and filed for record with the Collin County Clerk, in accordance with the City of McKinney's subdivision regulations. Typically, preliminary-final plats are considered by the Planning and Zoning Commission. This preliminary-final plat has bypassed the Planning and Zoning Commission and is being considered by the City Council because the applicant has requested several variances to the requirements of the Subdivision Ordinance. Per the Subdivision Ordinance, only the City Council can grant a variance.

The applicant is requesting to subdivide the property into two lots. The subject property currently has one residence on the property. The applicant has indicated to Staff the desire to not construct or escrow for the typical required improvements, such as water, sanitary sewer, and roads; however, the applicant has agreed to provide the easements for said infrastructure, and to enter into a facilities agreement with the City of McKinney.

PLATTING STATUS: The subject property is currently unplatted. Subsequent to the approval of the preliminary-final plat, a record plat or plats, subject to review and approval by the Director of Planning, must be filed for recordation with the Collin County Clerk, prior to issuance of a building permit.

Road Improvements: The site is currently served by Private Road 5312 which is a 20-foot wide gravel private access easement. The applicant would be required to improve the access easement to and across their frontage by constructing a minimum 24-foot concrete curb & gutter driveway. The applicant has dedicated an easement for access and has requested a variance from construction requirements.

Future Independence Parkway will cross the western portion of the tract. Dedication of right-of-way and construction of this roadway would not be proportional to the impact of the development. The applicant has provided a no-build reservation for the future roadway and has requested a variance from right-of-way dedication and roadway construction requirements.

Water Improvements: The site is currently served by a private service line. The applicant would be required to construct a minimum 8-inch City of McKinney water line parallel to Private Road 5312 across their frontage, along with 1,000 feet of offsite water line capable of serving the site. The applicant is dedicating an easement for the future water line improvement and has requested a

variance from the construction requirements.

The applicant would be required to construct a minimum 24-inch City of McKinney master planned water line parallel to Future Independence Parkway. Dedication of easements and construction of this water line would not be proportional to the impact of the development. The applicant has provided a no-build reservation for the future water line and has requested a variance from easement dedication and water line construction requirements.

Sewer Improvements: The site has access to a City of McKinney sewer line, but is adequately sized to be served by individual septic systems. The applicant has requested a variance to allow continued use of an individual septic system.

Drainage improvements: The site receives drainage flows from agricultural, non-residential, and residential land upstream of the site. The applicant would be required to study the drainage area and provide adequate capacity for fully-developed flow through the site.
