LOADING SPACES: Per Section 146-131 (Off-Street Loading), All loading spaces shall be located within 25 feet of the building. The applicant is seeking a variance to locate the loading spaces required for development of the retail building approximately 40-50 feet from the building. The Zoning Ordinance states that a variance can be granted during site plan approval to decrease the distance of the loading docks and associated loading spaces from the proposed building and to allow

the loading space to be located more than 25 feet from the building if the Planning and Zoning Commission finds that:

- Unique circumstances exist on the property that make application of specific items in this section (Sec. 146-132) unduly burdensome on the applicant;
- The variance will have no adverse impact on current or future development;
- The variance is in keeping with the spirit of the zoning regulations, and will have a minimal impact, if any, on the surrounding land uses; and
- The variance will have no adverse impact on public health, safety, and general welfare.

The applicant has proposed that the loading space be located approximately 40-50 feet from the main building. Given the limited size of the property and established access, Staff understands the difficulty of locating the loading spaces within 25 feet of the building. As such, Staff has no objection to the applicant's request.

The applicant has satisfied all other minimum requirements as specified in Section 146-131 (Off-Street Loading) of the Zoning Ordinance.
