The applicant is instead responsible for meeting the requirements of the Building Site and Design Standards of the MTC. With the submission of a site plan, the MTC requires that elevations are provided and approved with the site plan.

DESIGN EXCEPTION: A Design Exception is a requested deviation from any Building Form and Site Development Standards, Building Design Standards, or Open Space Standards, beyond minor deviations specified in the Minor Modifications section of the "MTC" - McKinney Town Center Zoning District. All requests for a Design Exception are forwarded to the Planning and Zoning Commission for discretionary approval.

In reviewing any site plan applications or Design Exception requests, the Planning and Zoning Commission shall use the following criteria:

- 1) The goals, intent, and vision of the adopted McKinney Town Center Master Plan;
- 2) The extent to which the proposal fits the adjoining design context by providing appropriate building scale and use transitions;
- 3) The extent to which the proposal provides public benefits such as usable civic and open spaces, livable streets, structured and/or shared parking, and linkages to transit;
- 4) The extent to which the proposal hinders future opportunities for higher intensity Town Center development; and
- 5) Considerations of health and welfare of the general public.

While several Design Exceptions have been requested, Staff is of the opinion that given the location of the site and the constraints of the property the project warrants the requested Design Exceptions. As such, Staff recommends approval of the request.
