EXHIBIT D – DEVELOPMENT REGULATIONS

Applicable Regulations: The Property shall develop in accordance with the standards set forth herein and all other ordinances, rules and regulations of McKinney, as they currently exist, or may be amended in the future. In the event of a conflict between this Ordinance and any other City ordinance, rule or regulation, this Ordinance shall control.

1) Definitions

- a) **Property** means the property described on Exhibit B (“**Property Map**”) of this Ordinance.
- b) **District** means the Single-Family Residential (“SFR”), Multi-Family Cottage (“MFC”), Multi-Family Traditional (“MFT”), Regional Commercial (“RC”), Local Commercial (“LC”), Neighborhood Commercial (“NC”) depicted on Exhibit F (“**District Map**”) and more fully described herein.
- c) **Residential Building Standards** means the standards regulating setbacks, dimensions, height, and other development regulations for all Residential Districts within the Property further depicted in Table SFR-1 and MF-1 respectively.
- d) **Commercial Building Standards** means the standards regulating setbacks, dimensions, height, and other development regulations for all Commercial Districts within the Property further depicted in Table C-1 herein.
- e) **Zoning Ordinance** means the McKinney Unified Development Code as amended.

2) Planning Area(s) – the planning Areas depicted on Exhibit E (“**Planning Area Map**”), described in Table R-1 and C-1 and referred to in this Ordinance as Planning Area 1, Planning Sub-Area 1, Planning Area 2, Planning Area 3, Planning Sub-Area 3, Planning Area 4 and Planning Area 5.

- a) **Planning Area 1 – Gateway East** is a mixed-use area designed to integrate residential and commercial uses into a cohesive neighborhood unit. Development standards will ensure a compatible mix of uses, with transitions in scale and intensity that respect the character of adjacent areas. Residential Uses may include single-family homes, townhouses, and multi-family consisting of higher densities to support varying commercial uses such as office and retail services, that are appropriate to the Planning Area as the Eastern gateway to the Property.
- b) **Planning Sub-Area 1 – Town Center** provides a mix of uses including both low- and high-density residential units, small-scale retail opportunities, and central public gathering spaces that encourage a pedestrian-friendly environment that enhances community interaction, promotes sustainability, and supports economic vitality.
- c) **Planning Area 2 – Regional Hub** shall integrate multi-family residential and commercial uses that include retail, dining, and business services including potential corporate headquarters to serve the needs of the community and surrounding regions. The Regional Hub shall include a focus on pedestrian accessibility, attractive storefronts, and ample parking. Development guidelines will require high-quality materials, facade treatments, and signage controls to ensure an aesthetically pleasing commercial district.
- d) **Planning Area 3 – Lakeview** shall be designed to provide a broad range of housing options. This Planning Area will emphasize the pedestrian connections between the southern NRCS lake, the Honey Creek floodplain, and Erwin Park. Development standards should encourage a heightened streetscape and architectural diversity.

- e) **Planning Sub-Area 3 – Parkside District** within the Lakeview Planning Area should provide a variety of complementary housing options while permitting flexibility for smaller neighborhood retail nodes and mixed uses that open on to the regional trail corridor connecting the Property to Erwin Park and the surrounding region.
 - f) **Planning Area 4 –Gateway West** should include a variety of uses both residential and commercial that complement each other, leveraging the high visibility of Lake Forest Drive and the future Highway 380 bypass through higher intensity uses at these Gateways with a natural transition to the interior of the Property as the scale becomes more suburban.
 - g) **Planning Area 5 – Creekside** should provide a variety of housing options within a suburban design including larger lot sizes. It shall maximize views and access to the lakes and floodplain within. The pedestrian connectivity between these open spaces should be emphasized through trails, pocket parks, and amenity nodes.
- 3) **Planning Area Map** Development of the Property shall be in accordance with the Planning Area Map referenced in Exhibit D. The size and shape of each Planning Area or Planning Sub-Area listed in 2a-g shown on the Planning Area Map may change with Director of Planning approval provided the overall adjustments do not inflate or deflate the gross acreage of each Planning Area by more than ten percent.
- 4) **District Map** Use of the Property shall be in accordance with the District Map referenced in Exhibit F.
- 5) **Commercial Districts** Commercial Development Use Type Requirements and permitted locations shall be in accordance with the Planning Area Map, District Map, Table C-1 and C-2 as more fully described herein.
- a) **Neighborhood Commercial (“NC”)** – small-scale, low-intensity commercial, retail, office, service-oriented, and professional uses, and accompanying accessory uses, that serve primarily the surrounding neighborhood, and are typically located where collector roads intersect with other collector roads or arterial roads.
 - b) **Local Commercial (“LC”)** – mid-sized, medium-intensity commercial, retail, office, service-oriented, and professional uses, and accompanying accessory uses. Local Commercial areas are characterized by frequent visits of customers and clients and require access to good vehicular circulation, so are typically located where arterial roads intersect other arterial roads.
 - c) **Regional Commercial (“RC”)** – high-intensity office and professional uses while allowing commercial and retail uses in the district. The district is typically located along major regional highways, or at intersections with major regional highways.
- 6) **Residential District**. The Residential Districts encompass both Single-Family Residential and Multi-Family Residential uses. Permitted locations and number of units for all Residential Use Types shall be in accordance with the Planning Area Map, District Map and Table R-1. Development Standards and other Use Type Requirements including lot dimensions, setbacks and otherwise are more fully described in Table SFR-1, and Table MF-1 herein.
- a) **Multi-Family Cottage (“MFC”)** means a wide variety of low intensity multi-family residential units that is less than or equal to 16 dwelling units per acre on the same platted lot and no taller than three stories or 35 feet as more fully described in herein. This Type may include a mix of housing types, such as single-family dwellings, duplexes, triplexes, quadplexes and other lower density multi-family buildings.

- b) **Multi-Family Traditional (“MFT”)** means a type of residential development that is equal to or less than 30 dwelling units per acre on the same platted lot and no more than four stories in height. Certain areas on Exhibit F that are designated with a “*” shall allow for an administrative design exception permitting a more urban design palette and further described in Table MF-1.

7) **Project Tracking Plan:** A Project Tracking Plan shall be submitted with each preliminary plat, multi-family site plan, minor plats, replats and final plat to provide context for planning purposes and to serve as a “tracking tool” for compliance with this Ordinance. Updates to a Project Tracking Plan may be submitted at any time. It is an informational document that is used for tracking purposes only and no approval of a Project Tracking Plan is required. The Project Tracking Plan is depicted in Exhibit G and must contain the following information;

- a) The number of building permits for each Residential Unit Type issued at time of submittal and the total number required and/or permitted for the Planning Area and total Project; any maximum or minimum permitted counts for a unit type as defined in Table R-1 herein shall be included.
- b) The amount of acreage of Non-Residential Uses approved by a site plan and the total amount required and/or permitted for the Planning Area and total Project as defined in Table C-1 herein.
- c) The approximate number of Residential units (or range), as well as Residential types, authorized by an approved plat within each Area and the Property (i.e., Area-by-Area). For tracking purposes, each Project Tracking Plan submitted with a plat application will demonstrate general conformance with the Ordinance and will include a tabular summary of each recorded plat for all or any portion of the Property subject to this Ordinance.

Unit allowances and permitted locations within Planning Areas and the Property for all Residential Development are referenced below in Table R-1:

N/A = Not Allowed
P = District is permitted and is not subject to a minimum or maximum number of units.
NOTE 1: Table R-1 may be modified with the approval of City Council after a recommendation of the Planning & Zoning Commission, which approval shall not be considered a zoning approval or require an amendment to this Ordinance.
NOTE 2: Multifamily Uses shown on Exhibit E and referenced in Table R-1 can be developed as adjacent Commercial or Single Family uses at the discretion of the Director of Planning.

[1] Acreages shown are in gross measurements.

The following minimum development standards apply to Single-Family Residential Units (detached and attached):

Table SFR-1: Single-Family Residential Building Standards

	Lot Standards			Building Setbacks [2]				Max. Height	Max. Density

Notes:

[1] Side yard setbacks may be reduced to zero feet, so long as a minimum building separation of ten feet shall be maintained between dwelling units. If a zero-lot line product is to be constructed, this condition shall be applied on a block-by-block basis. The desired zero lot line side of each lot indented to accommodate such a residential product shall be indicated on a setback exhibit associated with an approved plat.

[2] Lots less than 50' (fifty feet) in width shall be accessed via alleys abutting the rear of the lot.

[3] These districts allow for meeting two of three minimum lot standards: area, width, or depth.

[4] If detached single-family uses are constructed within these zoning districts, these uses shall adhere to the space limits governing the Villa district.

[5] UDC provisions stating "Where a block is divided by two or more zoning districts, all lots shall comply with the requirements of the most restrictive front setback for the entire frontage" shall not apply.

[6] A 10' (ten-foot) encroachment zone shall be permitted between the front setback and the front property line within which porches, patios, and similar structures may be constructed. For the purposes of this section, porches and patios shall mean covered, open air recreation spaces which may or may not feature railings and/or low walls (approximately 30 to 40 inches in height as measured from the finished floor level of the space) to create a sense of enclosure. Covered, open air spaces that feature floor to ceiling walls with or without windows or other openings (example: sun rooms, sun porch, solarium, greenhouse) shall not constitute a porch or patio.

[7] A 7.5' (seven-and-a-half-foot) encroachment zone shall be permitted between the front setback and the front property line within which porches, patios, and similar structures may be constructed for Villa and Townhome Types.

[8] Prior to the approval or recording of a final plat, a maximum of three model home building permits per home builder may be issued, provided that a concrete paved surface with two points of access is available to access the units at the time of building permit issuance; however, no structure may be occupied until the final plat is approved and recorded.

[9] See Exhibit H Cluster Use Type for applicable Building Standards.

The following minimum development standards apply to Multifamily Residential Units described in Table MF-1:

Table MF-1: Multi-Family Residential Building Standards ^[1,2,3]

Notes:

[1] When a multi-family or non-residential use shares a property line(s) with a single-family, duplex, triplex, or quadplex residential use or a single-family residential zone, the following building setbacks shall apply along the shared property line(s): : 30 feet when adjacent to 1 story / 50 feet when adjacent to 2 stories, 2 feet of setback for each foot of building height when adjacent to 3 stories, and 3 feet of setback for each foot of building height when adjacent to 4 or more stories.

[2] The architectural and site standards for the multi-family residential land use areas shall conform to the McKinney UDC Article 2, Section 206 (4) (a) (I – V) and Section G.

[3] Areas labeled as “MFT*” on the District Map (Exhibit E) may develop in an urban manner with approval of a Design Exception by the Director of Planning. Eligible Design Exception(s) shall be strictly limited to increasing the density upward to a maximum of 48 du/ac, reducing the Front Yard Setback to 10', and increasing the maximum building height to 60'. To be considered for said Design Exception(s), the multifamily development must incorporate, at minimum, the following urban design elements:

- At the maximum approvable density of 48 du/ac, must provide structured and/or tuck under garage parking for no less than 80% of the total required parking for the development;
- meaningful, centrally located internal open spaces such as parks, plazas, courtyards;
- 10-foot-wide public sidewalks adjacent to public roadways.

The Director of Planning has the discretion to forward any Design Exception to City Council for approval at any time.

Land Use and Unit Type Acreage allowances for Commercial Development are depicted below in Table C-1:

EXHIBIT H – CLUSTER RESIDENTIAL USE TYPE

SFR Cluster Use Type

- All front lots shall front onto a public street. All other lots shall front onto a public street or a common area.
- Maximum Density: 10 lots / acre, inclusive of adjacent public rights-of-way.
- Zoning block shall be defined as a maximum group of 4 units around a shared common area and measured by the illustration below. A minimum lot width and lot depth is not applicable.
 - Minimum zoning block width: 120 feet
 - Minimum zoning block depth: 120 feet
 - Minimum building separation: 10 feet
 - Minimum public street setback: 15 feet
- Minimum Corner Side Yard Setback: 15 feet (15 feet where a side yard shares a front face with an adjacent lot).
- Allowable Setback Encroachments:
 - Porches and entry steps up to 5 feet into public street and corner side yard setbacks.
- Fireplaces, bay and box windows, and window seats up to 2 feet into public street setbacks.
- Permitted encroachments shall not impede the lot from satisfying the landscape requirements.
- Tree Requirements:
 - One canopy tree for all lots fronting or siding a public street.
 - One canopy or ornamental tree for each non-street fronting or siding lot.
- Shared Access Drive:
 - The shared access drive shall be a minimum of 20 feet in width and the common area shall be a minimum of 30 feet.
 - The shared access drive shall be distinguished from the Public Street through the use of colored stamped concrete, brick pavers or some other means.
- Parking Restrictions:
 - Lots and shared access drive shall be made subject to one or more Development Area Declarations upon the recording of one or more Notices of Applicability in accordance with the Master Covenant.
 - The Development Area Declaration will include, but not be limited to, the following limitations and restrictions:
 - No parking of any kind within the shared common area or on a lot other than on designated driveways or in enclosed garages shall be permitted.
 - Enclosed garages shall be used for the sole purpose of parking vehicles.
- Maximum Building Height: 36 feet
- All driveways shall be a minimum of 20 feet from face of garage to shared access drive pavement. A maximum of 5 feet of driveway can be included in the common area so long as it does not encroach in the required 20-foot shared access pavement. All driveways must take access off the shared access drive and common area.
