

CITY COUNCIL BUDGET GUIDELINES

FY 2025-2026

The City of McKinney's annual budget process is an opportunity to continuously ensure that McKinney residents receive exceptional services while enjoying top value for their tax dollars. These guidelines are intended to affirm Council goals for FY26:

- Budgets and departmental work plans will be established to support the Council goals established in February of 2025:
 1. Direction for Strategic & Economic Growth
 2. Operational Excellence
 3. Maximize the Development Potential of the McKinney National Airport
 4. Financially Sound Government
 5. Enhance the Quality of Life in McKinney
 6. Safe and Secure Community
- Staffing level adjustments will be made in adherence with our overall 10-Year Financial Plan and will be informed by the City's performance management program.
- Revenue estimates for all funds will be detailed, conservative, and realistic.
 - Tax revenue methodologies will be adopted based on actual data and projections drawn from data published by the Federal Reserve and other credible institutional sources along with averages of historical performance.
- The General Fund expenditure budget will be based on the following:
 - The City Manager will propose a fully funded and balanced budget.
 - Maintain a conservative tax levy that accounts for growth and service demands of the community.
 - Police and Fire Sworn Personnel pay structures will be based on continuing the current Meet and Confer agreements with appropriate market-based adjustments.
 - Maintain minimum fund balances and reserves as required by the City's financial policies with a General Fund reserve of not less than 25% of budgeted expenditures.

- The Utility Fund expenditure budget will be broadly based on:
 - Long-term financial sustainability of the funds
 - Implementation of rate adjustments as recommended by appropriate rate studies or rate adjustments of providers. An annual update of rate studies will be done to determine the fiscal condition of the funds.
- Both the MEDC and MCDC expenditure budgets will include an amount budgeted for roadway development based on the estimated sales tax revenue at the time of budget adoption. The budgeted expenditure amount will be adjusted at year end once the actual sales tax revenue is known.
- The proposed budget will seek to sustain the support of the Equipment and Facilities Replacement Fund that is being used to modernize our fleet and upgrade facilities.
- To the extent possible, the City will fund depreciation in all funds to minimize the need to issue debt and to cash fund needed infrastructure improvements.
