

MEMORANDUM

DEVELOPMENT SERVICES - ENGINEERING

TO: Paul G. Grimes - City Manager

FROM: Brook Retta, PE – CIP Engineer

CC: Barry Shelton – Assistant City Manager
Lisa Littrell – Procurement Services Manager

DATE: September 29, 2023

SUBJECT: Professional Services Contract for Architectural and Engineering Services – SH 5 Illumination Phase 2 (TR2356)

REQUEST:

The City of McKinney Engineering Department is requesting City Management approval, as allowed by Purchasing Policy, Chapter 19 – Procurement of Professional Services, and in alignment with Section 2254 *et seq.* of the Texas Government Code, to contract with the team of **WSP USA Inc.** for Professional Services Contract for Architectural and Engineering Services related to the design and construction of SH 5 Illumination Phase 2 (TR2356).

REASONING:

The Texas Department of Transportation (TxDOT) has retained **WSP USA Inc.** for design of planned roadway improvements to State Highway 5 (SH 5) from Powerhouse Street to SH 121. The City of McKinney Engineering Department proposes to enter into a future agreement with TxDOT to install continuous roadway illumination along the SH 5 corridor concurrent with the planned reconstruction of State Highway 5 by TxDOT. Under this future agreement, the City would fund and manage professional engineering services for the continuous illumination locally and would escrow funding to TxDOT for the associated construction cost.

The City of McKinney Engineering Department proposes to contract directly with **WSP USA Inc.** for these services as an extension to TxDOT’s current contract/scope of work. **WSP USA Inc.** is the most qualified firm to provide services under this city contract as they are already performing design services for the improvements to SH 5.

APPROVAL:
