RECOMMENDED CITY COUNCIL ACTION:

- Staff recommends approval of the resolution.

ITEM SUMMARY:

- The Legislature's GRIP (Gas Reliability Infrastructure Program) process allows gas utilities to receive annual rate increases associated with capital investments.
- The RRM (Rate Review Mechanism) process, which is summarized in the "background information" section of the staff report, has proven to result in a more efficient and less costly (both from a consumer rate impact perspective and from a ratemaking perspective) than the GRIP process.
- Given Atmos Mid-Tex's claim that its historic cost of service should entitle it to recover \$141.2 million in additional system-wide revenues, the RRM settlement at \$90 million for ACSC Cities reflects substantial savings to ACSC Cities. ACSC's consultants produced a report indicating that Atmos had justified increased revenues for ACSC Cities of at least \$81 million. Settlement at \$90 million (equivalent to \$81 million with a two-month delay) is fair and reasonable. New rates become effective December 1, 2020.

BACKGROUND INFORMATION:

- McKinney, along with 171 other Mid-Texas cities served by Atmos Energy Corporation, Mid-Tex Division ("Atmos Mid-Tex" or "Company"), is a member of the Atmos Cities Steering Committee ("ACSC"). In 2007, ACSC and Atmos Mid-Tex settled a rate application filed by the Company pursuant to Section 104.301 of the Texas Utilities Code for an interim rate adjustment commonly referred to as a GRIP filing (arising out of the Gas Reliability Infrastructure Program legislation). That settlement created a substitute rate review process, referred to as Rate Review Mechanism ("RRM"), as a substitute for future filings under the GRIP statute.
- On or about March 31, 2020, the Company filed a rate request pursuant to the RRM Tariff adopted by ACSC members. The Company claimed that its cost-of-service in a test year ending December 31, 2019, entitled it to additional system-wide revenues of \$141.2 million. Application of the standards set forth in ACSC's RRM Tariff required Atmos to reduce its request to \$136.3 million, \$98.7 million of which would be applicable to ACSC members. ACSC's consultants concluded that the system-wide deficiency under the RRM regime should be \$111.5 million instead of the claimed \$136.3 million. The amount of the \$111.5 million deficiency applicable to ACSC members would be \$80.8 million.

FINANCIAL SUMMARY:

- Atmos generated proof that the rate tariffs attached to the Resolution will generate \$90 million in additional revenues from ACSC Cities. ACSC consultants have agreed that Atmos' Proof of Revenues is accurate.
- The impact of the settlement on average residential rates is an increase of \$5.15 on a monthly basis, or 9.9 percent. The increase for average commercial usage will be \$15.48 or 6.56 percent.
- Further information is available in the body of Exhibits A-C in the Ordinance, and the ACSC Staff Report Attachments.
